

Kabir Joshi

Software Engineering Candidate

PROFESSIONAL SUMMARY

High-alignment Python Backend Developer with explicit academic and internship experience setting up robust Flask microservices, optimizing relational databases, and utilizing Git version tracking in team-centric staging setups.

TECHNICAL CAPABILITIES MATRIX

Core Competencies: Python, Flask, MySQL, RESTful APIs, Git, VS Code, Postman, Linux CLI

PROFESSIONAL EXPERIENCE

Backend Engineering Intern | Cognifyz Technologies (3 Months)

- Coded, tested, and shipped 15+ REST API endpoints using Python and Flask.
- Designed optimized MySQL relational database execution scripts, boosting query speeds by 15%.

TECHNICAL PROJECTS PORTFOLIO

Student Database Tracker: Engineered an institutional record platform mapping multi-semester schemas securely over MySQL.

Green Computing Analyzer: Scripted a tool to capture system hardware parameters and map power draw variations.
