

Parser Testing Matrix Indicator: Framework Variant Match (Strong Python/SQL/Git core, but utilizes Django/PostgreSQL instead of Flask/MySQL)

Rohan Deshmukh

Software Engineering Candidate

PROFESSIONAL SUMMARY

Competent Python Backend Engineer offering core object-oriented programming depth. Highly fluent in Python backend services, but leverages Django instead of Flask for handling database persistence layer routing.

TECHNICAL CAPABILITIES MATRIX

Core Competencies: Python, Django, PostgreSQL, REST APIs, Git, Docker, PyCharm, Linux

PROFESSIONAL EXPERIENCE

Backend Developer Associate | DataCore Systems (6 Months)

- Programmed structural web app pipelines using Python and Django MVC architectures.
- Managed complex data models over PostgreSQL, optimizing indexing matrices to trim query response times.

TECHNICAL PROJECTS PORTFOLIO

Academic Record Matrix: Created a secure backend registry app utilizing relational database triggers.

Hardware Resource Monitor: Developed an operational dashboard tracking processor runtime histories.
