

Parser Testing Matrix Indicator: Overqualified Match (Possesses all baseline requirements but operates at a much higher architectural/senior seniority tier)

Meera Kulkarni

Software Engineering Candidate

PROFESSIONAL SUMMARY

Senior Software Architect with 7+ years managing large-scale distributed enterprise infrastructures. Deep Python expert who scales cloud pipelines, manages multi-tenant databases, and coordinates engineering squads.

TECHNICAL CAPABILITIES MATRIX

Core Competencies: Python, Flask, Django, MySQL, AWS (Lambda, EC2), Docker, Kubernetes, CI/CD Pipelines, Redis, Git

PROFESSIONAL EXPERIENCE

Senior Backend Architect | NetScale Solutions (2023 - Present)

- Engineered complex Python-driven microservice clusters executing 4M+ daily production hits smoothly.
- Led database modernization shifts to handle distributed cross-region horizontal sharding across massive MySQL clusters.

TECHNICAL PROJECTS PORTFOLIO

Enterprise Payment Ledger Framework: Designed an immutable transaction processing grid operating with low latency constraints.
