

Parser Testing Matrix Indicator: Skill Skew Variant (Good cultural fit but primarily a frontend engineer with only secondary Python/Flask exposure)

Ananya Hegde

Software Engineering Candidate

PROFESSIONAL SUMMARY

Full Stack Software Engineer with a heavy skew toward client-side UI optimization, dynamic state engines, and accessible styling templates, backed by functional knowledge of Python server environments.

TECHNICAL CAPABILITIES MATRIX

Core Competencies: JavaScript, React, Next.js, HTML5, CSS3, Tailwind CSS, Python, Flask, Git, Figma

PROFESSIONAL EXPERIENCE

Frontend Heavy Engineer | WebCraft Agency (2024 - Present)

- Developed modular components inside React, boosting Lighthouse responsiveness scores by 35%.
- Scripted small test endpoints inside Python Flask wrappers to process simple incoming client JSON arrays.

TECHNICAL PROJECTS PORTFOLIO

Interactive Portfolio Portal: Designed an open-source layout featuring custom nested animation handlers.
