

Parser Testing Matrix Indicator: Framework Gap Match (Strong raw logic/core Python capability, but lacks explicit Flask framework exposure)

Aditya Kulkarni

Software Engineering Candidate

PROFESSIONAL SUMMARY

Computer Science undergraduate with strong raw algorithmic problem-solving capacity and core procedural skills, currently seeking an introductory entry block to transition into advanced web layer frameworks.

TECHNICAL CAPABILITIES MATRIX

Core Competencies: Python (Core), C Programming, Java, SQL, Object-Oriented Design, Data Structures, Git, VS Code

PROFESSIONAL EXPERIENCE

Academic Capstone Peer Mentor | Institution Labs (2025)

- Refactored foundational bubble sort and array filtering logic structures for junior classes inside C and Python environments.
- Formulated strict relational database querying logic strings during academic lab assignments.

TECHNICAL PROJECTS PORTFOLIO

Algorithmic Sorting Sandbox: Built a procedural terminal tool visualizing code execution steps.
