

Parser Testing Matrix Indicator: Domain Bias Variant (Uses Python daily but for analytical modeling, data manipulation, and statistics rather than backend web development)

Vikram Prabhu

Software Engineering Candidate

PROFESSIONAL SUMMARY

Data Scientist and Quantitative Specialist focused on building analytical mathematical models, training neural pipelines, and handling matrix data structures inside mathematical Python environments.

TECHNICAL CAPABILITIES MATRIX

Core Competencies: Python, Pandas, NumPy, Scikit-Learn, SQL, Git, Tableau, Jupyter Notebooks

PROFESSIONAL EXPERIENCE

Junior Data Analyst | Insights Analytics Corp (2025)

- Crafted Python scripts utilizing Pandas to parse, clean, and isolate unstructured logistical telemetry pools.
- Managed intermediate SQL aggregations to feed clean matrix arrays directly into reporting layers.

TECHNICAL PROJECTS PORTFOLIO

Predictive Class Trend Predictor: Modeled statistical linear regressions evaluating multi-parameter student performance histories.
