

Parser Testing Matrix Indicator: Tech Stack Mismatch (Experienced backend candidate but uses JavaScript/Node/Mongo instead of the required Python/Flask/MySQL)

Nisha Shenoy

Software Engineering Candidate

PROFESSIONAL SUMMARY

Backend Software Developer specialized in building scalable, real-time asynchronous networking environments. Highly proficient in clean API practices and code lifecycle steps, utilizing node-based technology stacks.

TECHNICAL CAPABILITIES MATRIX

Core Competencies: Node.js, Express, JavaScript, MongoDB, REST APIs, Git, Postman, Linux CLI

PROFESSIONAL EXPERIENCE

Junior Backend Developer | AppVantage Labs (1 Year)

- Deployed 20+ asynchronous REST endpoint hooks using Express and Node.js.
- Maintained document database collections in MongoDB, eliminating complex relational lookup overheads.

TECHNICAL PROJECTS PORTFOLIO

Dynamic Catalog Registry: Created an open-source asynchronous indexing system managing fast inventory adjustments.
